and Physiology. The Doctor is convinced that the same all-wise being has created in the vegetable world a remely for every disease that feed be heir to. Anatomy teaches that the human body contains many important organs called glazds, each of which is employed in secreting from the blood is own appropriate fluid, the chief of which is the Liver, Kid-neys, Salivery and dianodiar bodies connected with the porce of the skin. The Liver and Salivery Glands secreta-from the blood those fluids that carry on the wife of diges-tion, and dus promote the healthy action of the bowels. from the blood those finds that carry on the work of dig estion, and thus promote the healthy action of the bowels.—The kidneys and skin secrete from the blood those deletertons impurities which, if obstructed, will produce many discases and health be entirely impaired. Now, this vegetable compound attacks the liver, stimulates it to action, removes its diseases, corrects the billious and digestive organs, causing the kidneys to act and opening the pores of the akin.—Hence the "Purification of the Blood," whereby perfect health is restored. For convincing proof of the above the Doctor requests a perusal of his pamphlet, sotting forth most fully the philosophy of their action, with fall directions and certificates of unparalleled cures. Elm, corner of Canai-st. where those wishing to purchase are invited to call and see them in operation. Mesers. H. W. B. & Co. are authorised to make sales of Rights or Machines for use in this city.

These machines are so easily managed, that a child of 14 years of age has kept, even machines (which are proposed by steam and employed in making begs) in good order for some months past, attending at the same time to the running of her own machine and doing with it the work of four adoles if sewing by hand.

These machines can be driven by hand, treddle, or steam power. To persons wishing to make an experiment hefore buying, a machine would be rented at a moderate price.

We confidently assert that these are the only machines of real practical utility, and while we invite an examination of real practical utility, and while we invite an examination of real practical utility, and while we invite an examination of real practical utility, and while we invite an examination of real practical utility, and while we invite an examination of the machines now in operation, we repeat our caution against infringments, which will certainly be prosecuted.

The Olmstead Patent Magnetic Machine, for MEDIGAL purposes, is so entirely different from any other medical instruments, that no person can form a proper idea of its advantages without wincessing its operations, when they will be found so apparent as to render argument superfuous. The current of electricity is completely under the control of the operator, and can from almost imperceptibility, be gradually increased to any strength the patient may desire, while, instead of feeling the painful spasmodic contraction of the muscles produced by all other medical instruments, a gentle current is flowing pleasantly through the nervous system. Telegraph Companies are respectfully informed that every description of Magnetic and Chemical Telegraph apparatus is kept constantly on sale at NORTON'S TELEGRAPHIC ROOMS, where all orders must be addressed.
